

IVY CLOSE, LEYLAND

LOCATION: LEYLAND

TYPE: DRIVEWAY SURFACING

The Project

A mix of silver and red aggregate which was chosen as the colour to co-ordinate with the red-brick used in the construction of the property.

In order to identify the most suitable surface and supplier for our driveway refurbishment we contacted numerous companies and tradesman, identifying the pros and cons of various finishes from block paving to resin bound gravel.

Resin bound gravel gave us the most suitable low maintenance finish and DCM Surfaces, whilst not being the cheapest supplier, provided the most professional approach, spending time both at our home but also inviting us to their head office in Leyland where they discussed the options at length and ultimately created a bespoke sample of the gravel colours and sizes we had decided upon.

Within a few days we were contacted by their operations dept who identified a suitable starting date. The workman arrived on time and commenced the work with the foreman discussing the work with us to ensure they were following our plans.

Once all groundwork was completed the resin bound finish was applied to a consistent depth and hand trowelled to what was a perfectly smooth finish, which across 120m² was very impressive.

Throughout the process the foreman checked that we were happy and on conclusion of the work, all dirt, rubbish and waste was cleared leaving us with a fantastic driveway finish.

I would definitely recommend the resin bound driveway finish which looks stunning, is totally permeable so no puddles although you will need to put up with slow passes from neighbours as they give it the once over.

I would also thoroughly recommend DCM as a supplier, their professional approach, work ethic and attention to detail are second to non, providing us with a driveway we are very happy with.

**MR HUGO,
HOMEOWNER**
