

## WISWELL LANE, WHALLEY

**LOCATION: WISWELL LANE, WHALLEY**

**TYPE: DRIVEWAY SURFACING**

### Background

DCM Surfaces was approached to provide a bound gravel surface for the driveways at a prestigious new development in Wiswell, Whalley, which would reflect the premium build quality of the site.

### The Project

The Brittany Bronze aggregate which was chosen as the colour to co-ordinate with the stone used in the construction of the properties has proved to be the ideal surface of choice.

“

DCM Surfaces recently laid specialist surfaces to the drives at our development in Wiswell. They were a thoroughly efficient and well organised company, and the finished product was excellent.”

**OWNER OF THE NEW DEVELOPMENT**
