

## LOWER DRAYTON FARM CASE STUDY

**LOCATION: STAFFORDSHIRE**

**TYPE: ARTIFICIAL GRASS WITH  
LINE MARKINGS**

### BACKGROUND

Lower Drayton Farm is a family fun farm, offering a variety of activities in the heart of the countryside.

### THE PROJECT

DCM installed Evo Pro Artificial Grass as part of the new indoor soft play area. Line markings were painted onto the sports grass to create a miniature sports pitch for children to play football and other ball games.

The installation took place on an upper floor level, meaning the access for the project had to be taken into careful consideration when delivering materials and getting equipment to the area of works on site.
