

ROCK UP CLIMBING CENTRE CASE STUDY

LOCATION: LAKESIDE

TYPE: WETPOUR

BACKGROUND

Rock Up Climbing Centres opened it's new site at Lakeside, towards the end of 2019. The new centre features 27 climbing walls and a soft play area for all ages of children to enjoy.

THE PROJECT

DCM were approached by the climbing centre chain whom enquired about the installation of safety surfacing around the climbing walls and soft play equipment. Black wetpour was laid to a depth of 70mm to support the critical fall height requirements. Pops of colour were also part of the design to match the vibrant climbing and play equipment.
