

ARTIFICIAL PLAY GRASS

...for schools, playgrounds and public play areas

Artificial Grass is porous and low maintenance. The grass is soft to touch and a clean, hygienic alternative to traditional grass.

When used for play surfaces, we install a soft rubber base beneath the carpet. This ensures safe play when Critical Fall Heights of up to 1.2m** are required.

Artificial Grass is often installed alongside Wetpour, Rubber-Gravel mix or Rubber Mulch to create areas of themes and contrasting textures.

“ We have worked with DCM on many outdoor play projects over the years, and turned to them for their expertise in installing EPDM, Mulch and Artificial Grass.

The quality of the work is excellent and we would have no hesitation in recommending DCM to anyone.

Business Development Manager, Setter Play Ltd. ”

Key Specifications

- Soft and natural looking
- Bespoke grass creates unlimited design possibilities
- Wide range of colours and yarn
- No muddy feet
- Achieve Critical Fall Heights of up to 1.2m**
- Low maintenance
- Constructed with drainage to stay dry underfoot

RECOMMENDED BUILD UP TO CREATE A PERMEABLE SURFACE:

Artificial Grass layer

25mm SBR base course*

Min 150mm MOT type 1 dependent on ground conditions

Geotextile membrane

Edge options: Rubber, Concrete, Aluminium

*Standard build up. Depths may vary depending on use/sub-base

**When applied to a 38mm SBR base course.

ARTIFICIAL PLAY GRASS

Base

The base must be dry and of sound construction.
